AFRI-FRUIT'S LIMITED has
proven, tested
competencies (with
verifiable
achievements) in the
following areas:

DRIP IRRIGATION SYSTEM

Drip Irrigation System is an advanced method of irrigation system in modern day agricultural practice. This method of irrigation is efficient in water management, distribution and application of fertilizer and it is considered to be accurate.

DRIP IRRIGATION SYSTEM

It ensures maximum yield in the production of vegetables. It can be used in scales from 500 SQ.m to 2 Hectare using the gravitational force whereas 3 Hectares and above is operated with water pumps.

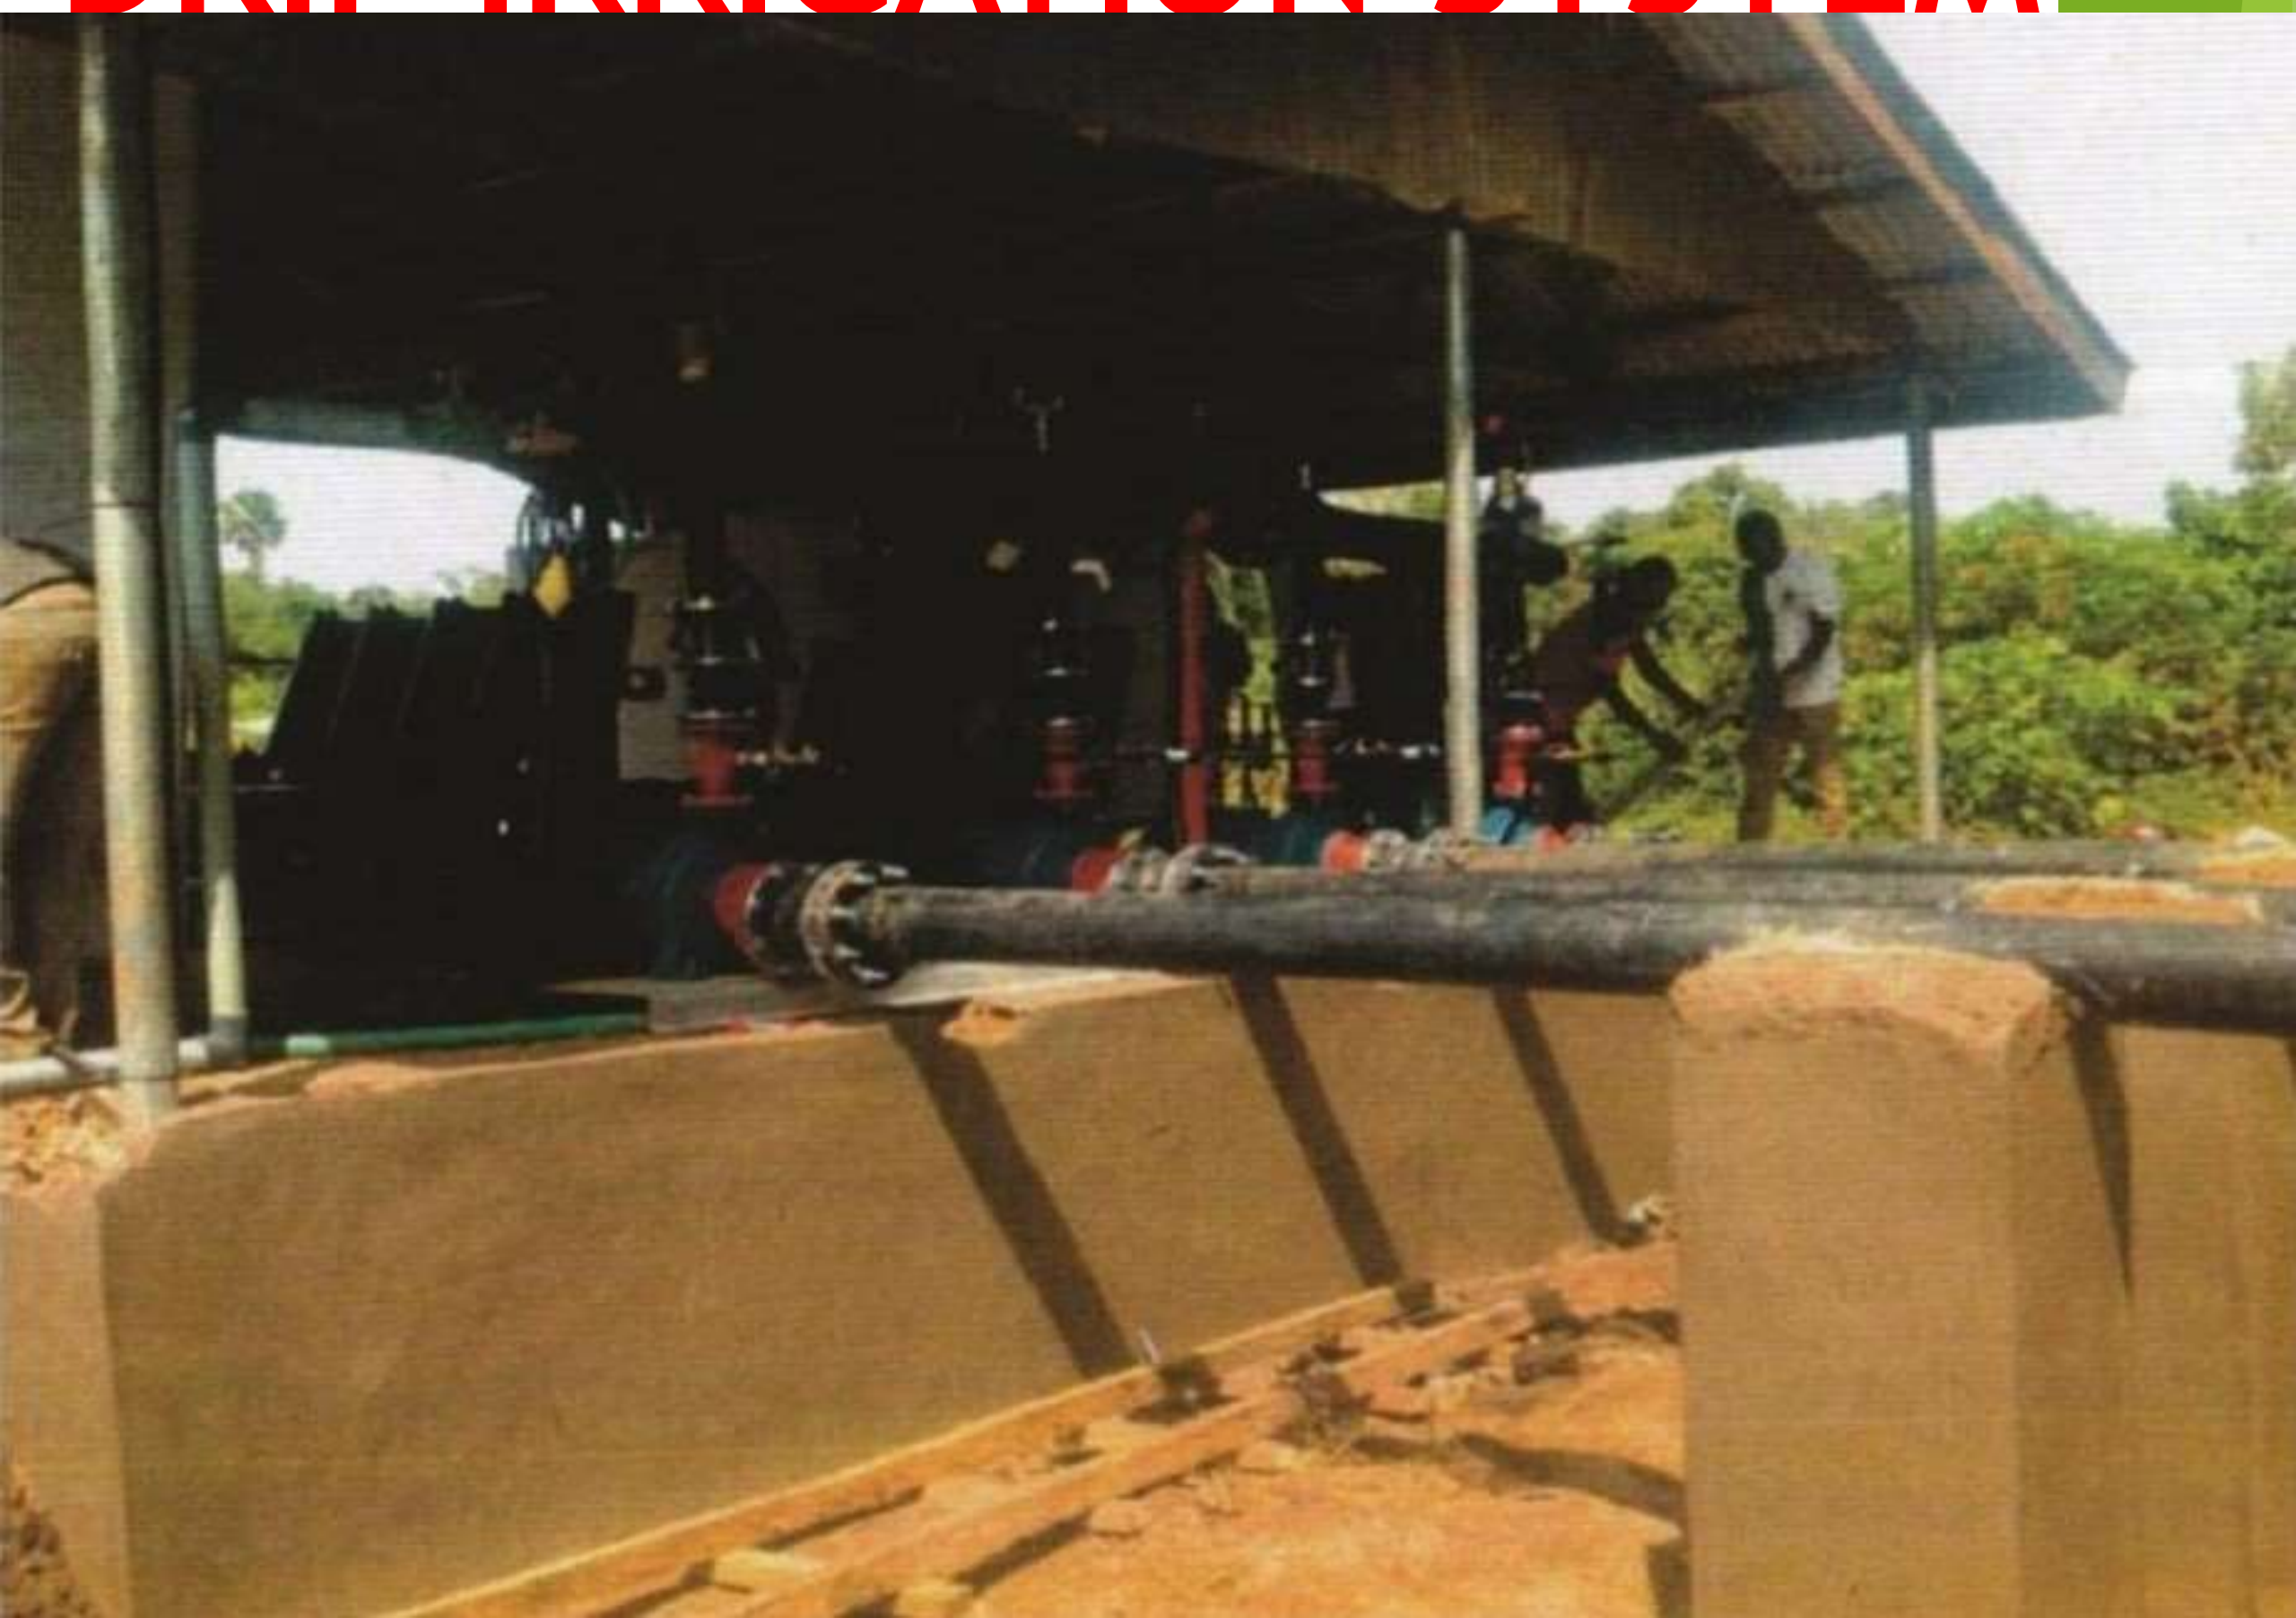

DRIP IRRIGATION SYSTEM

Our latest drip irrigation project was in Ekiti State for the installation of 45 hectares of Drip Irrigation for small scale farmers for the production of vegetables under the State Ministry of Agriculture and Natural Resources.
